

DIY Workshops

Electronic Components & Precision Manufacturing

Sheet Metal Fabrication & Small-Batch Customization

▶▶ Product Features

Semi-Enclosed Design — Stable, Safe & Durable

16 years of laser equipment design experience, with over 10,000 machines in use.

Movable Box-Style Worktable — Flexible & Versatile

Lightweight, compact and highly integrated. Suitable for factories, studios and outdoor applications.

Multi-Platform Control System — Easy to Use

In-house technology supports multiple cutting applications and custom requirements.

Integrated Ventilation — Dust, Smoke & Heat Removal

Viewing window, efficient exhaust and adaptive control for smoke extraction and heat dissipation.

In-House Core Components — Excellent Value

Laser source, cutting head and CNC system developed in-house for reliable, practical performance.

▶▶ Applications

Hardware parts; sheet metal fabrication; equipment enclosures and cabinets; automotive and motorcycle parts; molds and tooling fixtures; electronics and precision manufacturing; kitchen and bathroom hardware; metal crafts; makerspaces and laboratories; academic teaching; personal DIY and small workshops; small-batch customization; creative design; on-demand fabrication; architectural models; jewelry and nameplates.
